GREENMEUP

Green Biomethane Market Uptake

GreenMeUp enhances the uptake of biomethane in the European energy and transport sectors

- Bridging the gap between EU Member States within the biomethane Market sector
- Providing a basis for policy-makers and stakeholders to develop more informed RES policy

Biomethane is a key renewable energy source for the decarbonisation of the EU

Biomethane can reduce reliance on natural gas imports and increase renewable energy shares

Only a limited number of EU Member States have significant deployment rates of biomethane

Approach

Evaluate framework conditions and market dynamics for EU countries with high production rates of biomethane and low market development

Design a country-tailored set of market uptake measures that will refine existing policies on biomethane

Ensure active stakeholder engagement and high societal acceptance levels through science-based evidence
